

Aquasure STORAGE water purifier is a 4 stage non electric water purifier targeted towards middle and lower middle class in areas where penetration of water purifier is very low because of cost and less availability of electrical power. This product is to replace the conventional Steel body water filter with ceramic filters in Village, Urban, Semi urban and city areas for SEC B and below with a technological yet affordable product to suit all the unique environmental and user requirements and basic needs and to say "Pure Water for All".
